\$150 rebate on the new Sierra Wireless AirCard 775 EDGE PC Card Modem.

Sierra Wireless
AC775

Get fast speeds and international wireless coverage for your laptop—with big savings.

The new quad-band AirCard® 775 EDGE PC Card modem from Sierra Wireless offers AT&T Wireless business customers access to the fastest national wireless network and international roaming capabilities. So when your business takes you on the road, you can be connected to your data.

With the AirCard 775 and the AT&T Wireless EDGE network, you can enjoy the fastest national wireless data network with data speeds of up to 100-130 Kbps and burst speeds of up to 200 Kbps. This PC Card modem features:

- Advanced quad-band technology (850/900/1800/1900 MHz bands) for unbeatable domestic and international connectivity.
- Roaming on over 115 international providers in over 70 countries on a combination of EDGE and/or GPRS networks.
- Standard type II PC card compatibility for laptops computers.
- Simple installation and ease of use.
- Flat rate predictable pricing available.

The AT&T Wireless EDGE network delivers the speed and coverage that mobile professionals demand—for email messaging and access to corporate LANs and mission critical applications. It provides secure wireless access to download presentations, spreadsheets, and other documents, as well as to browse the Internet with greater speed and efficiency than ever before.

Act now to save big on this limited-time offer.

Sign up for an AT&T Wireless \$79.99 Unlimited Mobile Internet Plan under a qualified, minimum two-year agreement by January 6, 2005 and get an AirCard 775 EDGE PC Card modem for \$149.99 after a \$150 rebate. That's 50% off the suggested retail price of \$299.

For more information or to order your AirCard 775 PC Card modem with the \$150 rebate, contact your AT&T Wireless Account Representative.

IMPORTANT INFORMATION

Service: Requires credit approval, qualified minimum one year agreement and rate plan, and compatible EDGE device. Network download speeds with EDGE PC Card modem. Network speed is no indication of the speed at which your device sends or receives data. Actual download speeds depend on distance from cell site, network availability and traffic, device, applications, tasks, file size and other factors. Comparison based on published speed claims of national mobile wireless data networks. EDGE devices operate on GPRS networks at GPRS speeds. Secure access refers to the authentication and encryption features available on the AT&T Wireless network. Not available for purchase or use in all areas. Coverage is subject to transmission limitations and terrain, system, capacity and other limitations. An international roaming feature is required for international roaming. Additional restrictions apply. Service is subject to Service Agreement and applicable rate plan and other materials. Rebate: Requires two-year eligible agreement, qualified purchase of eligible EDGE modem card and service activation under the AT&T Wireless Mobile Internet Plan \$79.99 Unlimited Data Plan between 9/17/04 and 1/6/05. Offer limited to one per eligible service activation. Must be active for 30 days and when rebate is processed; allow 8–10 weeks for rebate check; see rebate form for full details. Mail-in rebates not available in CT.
